## ABOUT ME

Graduated as an informatic engineer at Universidad Rafael Belloso Chacin, having more than 6 years learning, and 4 years of demonstrable experience creating web apps, coding mainly in modern JavaScript, React Native, React.js, Node.js, SQL/NOSQL DBs, PHP +7.0/+8.0, Laravel, Tailwindcss, Bootstrap, HTML and CSS, constantly learning. Great teamworker with an impeccable reputation as a programmer, experience working remotely.

## EDUCATION

### UNIVERSIDAD RAFAEL BELLOSO CHACIN
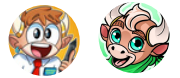

Informatic Engineering,
Aug 2018 – Nov 2022

### UDEMY

HTML, CSS JS PHP and Laravel Developer – MernStack Developer, and others.
2021 – 2023

# EXPERIENCE

## HORNSTROMP STUDIO (CONTRACT/REMOTE)
**Fullstack Web Developer – Bulding, optimizing, and enhancing key features with popular APIs.**
**Jul 2024 – Present**

- Integrated functionalities using APIs like YouTube and merged videos using FFmpeg.
- Suggested and implemented UI enhancements, such as new popups.
- Identified and resolved production bugs.

## SOUSTITREUR – CANADA (CONTRACT/REMOTE)
**FullStack Web Developer – Proficient in building, optimizing, and troubleshooting key functionalities.**
**Aug 2023 – Jun 2024**

- Migrating current functions of main project to secondary project and mobile app.
- Fixing bugs, sometimes finding them without any information about it.
- Updating functionalities and creating new important features they need for soustitreur and pluscrew projects.

## BLUECARIBU – COLOMBIA (CONTRACT/REMOTE)
**FullStack Web Developer creating multiple web projects**
**March 2023 – Jan 2024**

- I created an app from scratch using JavaScript (react, node, socket.io, mongodb, and more).
- I have created some new features and updated other functionalities previously built.
- I fixed some bugs debugging functions of the app.
- Fast learner and problem solver.

## ALFA CO SAC – PERU (FREELANCE/REMOTE)
**FullStack Web Developer creating JavaScript/PHP app and other features**
**Jul 2020 – Sep 2023**

- I made an API REST to make the connection between a mobile app and the database, using JavaScript/PHP.
- I created and deployed an administrative app from zero satisfying client needs using JavaScript/PHP.
- Making new features and fixing bugs.
- I created the entire database from scratch using MySQL and connecting db and client with PHP and JavaScript.
